

Progressive SOS Alerting

Unmatched peace of mind, exclusively from ZOLEO

When ZOLEO users trigger an SOS alert, they can rest assured that the **expert 24/7 global emergency response** coordination service will confirm their alert and notify the appropriate first responders.

The Progressive SOS Difference

With progressive SOS from ZOLEO, users automatically receive progressive status updates throughout an emergency incident. From the moment they press SOS, users will **receive step-by-step updates** via the app and be able to **exchange messages** with the emergency response coordination service.

Progressive SOS offers ZOLEO users an added measure of reassurance in an emergency by providing:

Confirmation the SOS alert has been received by the emergency response coordination service.

Verification the ZOLEO device's **GPS coordinates have been sent.**

One-touch access to exchange messages with the emergency response service.

A detailed log of events via the app.

Easy cancellation should the SOS alert no longer be required, and confirmation the cancellation has been received.

**ZOLEO offers unmatched peace of mind for you
and for everyone waiting at home.**
